...as a general purpose tool for mark and preview application.

Prior to using an commercial residential food waste processor for the food handling establishment, applications are sent to the local health department for approval. The applications provide information on the processor, type, size, and location of the establishment, and the location of the processor. The health department then issues a permit for the processor to be used. The permit is valid for one year. The health department also issues a permit for the processor to be used. The permit is valid for one year. The health department also issues a permit for the processor to be used. The permit is valid for one year.

Strike wall before use. GEOROL® AEROSOL is a ready-to-use, pressurized spray for application to a variety of locations and surfaces to control pests. Apply as a general surface spray, spot, or crack and crevice application. Use the supplied extension tube for crack and crevice applications. To apply as a general surface spray, simply hold can 15" to 24" away from surface to be treated. Use a sweeping motion over the surface to be treated for complete coverage. This product applies as a light layer that dissolves readily. An oily residue may be apparent in heavy applications. The visibility of the dissolving film eliminates the possibility of misapplication. GEOROL® AEROSOL is generally insecticides. Use the supplied extension tube and apply to wall voids, hollow base legs, door, window frames, vents, and support members. GEOROL® AEROSOL is generally non-staining, but in questionable situations, apply a small amount in an inconspicuous location. Apply once a month for continuous protection, or more often if conditions warrant.
